EXPERIENCE

Google

Software Engineering Intern

Mountain View, California

Sept 2018 – Dec 2018

- Built large-scale, robust data analysis pipelines to serve machine learning models for improving ad asset selection and composition.
- Streamlined and extended pipeline for selecting and enhancing top performing AdGroups, and increased total network revenue by 0.2%.
- Developed dashboards to evaluate performance of models and discover insights for further improvements.

datacoral Inc

Software Engineering Intern

San Francisco, California

Jan 2018 – Apr 2018

- Scoped out, architected, and implemented highly scalable materialized views in Redshift using Kinesis Data Streams, DynamoDB, and Lambda.
- Used timelabel tags to represent the state of underlying data, update materialized views when dependencies get updated, and handle schedule and view definition changes.
- Built critical APIs and migration scripts to launch a web application for monitoring materialized views and data pipeline performance.

Yelp

Software Engineering Intern

San Francisco, California

May 2017 – Aug 2017

- Evaluated solutions for better client-side JS error reporting.
- Implemented and deployed infrastructure to process over 25 million errors every month to over 20 services.
- Modernized build pipeline and built tooling to migrate services from Google Closure Library to ES6 and Webpack, and from npm to yarn.
- Helped develop infrastructure and tooling to migrate services to React, including server-side rendering of React components.

Ivy Global

Software Engineering Intern

Toronto, Ontario

Nov 2015 – Sept 2016

- Led the development of a bubblesheet scanner and grader using convolutional neural networks, and custom image processing algorithms to process blurred, tilted, and imprecise images.
- Developed an ASP web application that displays SAT scores and statistics for mock exams in real-time.

PROJECTS

kademlia-dht-rs

github.com/jeffrey-xiao/kademlia-dht-rs

Personal Project

Rust, Distributed Systems

- Implemented a distributed hash table using the Kademlia algorithm.
- Used strict parallelism to efficiently send RPCs to probe nearby nodes.

inSight

goo.gl/Qy4Tcj

Greylock Hackfest

Python, C++, Unity, TensorFlow

- Built an interactive AR headset that uses machine learning and custom image analysis algorithms to display information about the user's point of focus.
- Applied gaze tracking to enable full control of headset via eye movement.
- Used Bing and IoT technology to control home appliances and learn about surroundings in an intuitive way.

SKILLS

Proficient

Java // C // C++ // C# // Rust
JavaScript // React // Node
Python // Git // Linux

Familiar

Bash // Go // Scala

AWARDS

- First, Greylock Hackfest // 2017
- Second, MIT Battlecode // 2017
- Fourth, ACM ICPC East Central North American Regionals // 2016
- Bronze, International Olympiad in Informatics // 2016
- Gold, Canadian Computing Olympiad // 2016
- Silver, Canadian Computing Olympiad // 2015
- Platinum Division, USA Computing Olympiad // 2015

CERTIFICATIONS

- Certified Java SE 6 Programmer
- Algorithms I & II, *Princeton*
- Machine Learning, *Stanford*
- R Programming, *Microsoft & JHU*

EDUCATION

University of Waterloo

Bachelor of Software Engineering

2016 – 2021 // Waterloo, Canada

- 93.24% Cumulative Average
- Dean's Honour List (4 Terms)
- ACM Team Member

INTERESTS

- Distributed Systems
- Data Infrastructure
- Concurrent Computing
- Database Internals
